WORK-EXPERIENCE

May 2025-
Current **Investors Clinic Infratech Pvt. Ltd**
(Assistant Manager - Technology)

Lead the end-to-end development of the company's website, ensuring smooth deployment and testing on the CPAN server. Collaborate with cross-functional teams to design, develop, and optimize websites for enhanced user experience and performance.

Conduct regular checks and updates to confirm website functionality and security standards. Coordinate with development teams to troubleshoot, identify, and resolve issues promptly.

Nov 2023 -
May 2025 **Litera Centre – PHP Developer**

Handled the complete development of a learning platform, including video conferencing between students, teachers, and staff, along with implementing a billing system for course receipts. Worked on two Laravel-based projects:

One-on-One Classes Platform: Independently developed the frontend, backend, and database, ensuring seamless scheduling and session management.

Orbis HR Solution: Contributed to a hiring platform that streamlines recruitment processes for businesses.

July 2022 -
Oct 2023 **Perseverance IT Solutions Pvt. Ltd.**
(Software Engineer)

Developed web applications using Django to build secure, scalable backend services for internal security tools and automated threat detection systems.

Designed and optimized high-performance APIs using FastAPI for processing and analyzing security data in real-time.

Implemented new feature and functionalities based on client requirements. Optimized Database queries and improved overall application performance. Through testing and debugging to identify and resolve Conducting through testing and debugging to identify and resolve issue and bugs.

PROJECTS

1. TestCoach (PHP, Laravel)	≡ Utilized design patterns like MVC to separate presentation and business logic, enhancing maintainability and extensibility. ≡ Use Blade templates for views and keep them simple and focused on presentation. Avoid adding complex logic or database queries directly in the templates.
2. Orbis Hr Solutions (PHP, Laravel)	≡ Created a job management interface where the admin can manage which jobs are visible to users on the website. ≡ Built functionality to publish or hide job listings from the front-end based on admin preferences. ≡ Designed a dynamic job listings page that fetches active job postings from the database and displays them on the website.
3. Litera Center (PHP, Laravel, Wordpress)	≡ Implemented seamless video conferencing functionality within the Elitera platform using Java Script and Jitsi API in the Laravel. ≡ Enhanced user experience by enabling real-time interaction between students and instructors through video conferencing. ≡ Provided users with downloadable Excel reports, facilitating easy analysis and tracking of learning outcomes. ≡ Conducted thorough testing and debugging to maintain high standards of quality and functionality across all implemented features.
4. Whatspp Management system (PHP)	≡ PHP integrated with the WhatsApp API. The system allows for efficient group and community management, automating various tasks including: • Creating and managing WhatsApp Groups and Communities. • Adding and removing members from groups. • Assigning and revoking admin rights for group members. • Ensuring seamless communication and automation through WhatsApp API integration.
5. Home and Soul Website (React, PHP)	≡ Developed a scalable and responsive React.js website for "Home and Soul" focused on showcasing residential/commercial real – estate projects with clean UI and dynamic content rendring. • Built reusable component library (e.g, Banner, ProjectCard, Testimonials, ContactForm) to promote maintainability and consistent styling across the app. • Integrated API-driven data fetching using Axios (or Fetch API) to display real-time property listings, details, gallery images, and contact information. • Implemented client-side routing via React Router to manage navigation between Home, Projects, About, Contact, and other pages—ensuring seamless UX without full-page refreshes. • Ensured mobile-first responsive design using CSS Modules or Styled Components, creating optimal user experience on all device sizes.
6. Broriser (Wordpress, Core PHP)	≡ Custom real state crm – Built using a combination of Core PHP and WordPress for managing leads, enquiries, and projects efficiently. ≡ Project Listing – Enables adding and managing multiple real estate projects with details like budget, location, and amenities. ≡ Dynamic dashboard – Provides a real-time view of leads, site visits, and agent performance.
